LTW's LED Waterproof Connectors Link the Continents of Asia and Europe

【Taipei, Taiwan】

Bosporus Bridge has been one of Istanbul's important icons, and links the continents of Asia and Europe; now has been decorated by cutting edge of LED lights. For the establishment of decorative lighting system on the bridge, LTW waterproof connectors were used to connect this LED lighting system which illuminates and lighten the vitality of this old Bosporus Bridge.

Bosporus Bridge, completed in 1973 is located between Ortaköy (on the European side) and Beylerbeyi (on the Asian side) and spans the Bosporus strait; as well as the 4th longest suspension bridge span in the world. The most obvious part of bridge renovation is adopted the color-changing LED lighting system to Thus the whole interconnection system between power and light play the most import role in this scheme. LTW connectors with weather resistant and waterproof features are applied to this outdoor lighting system. These LED modulators with LTW panel mount waterproof connectors to construct LED lighting interconnection system for decorating Bosporus Bridge. LTW waterproof connectors not only connect LED lighting to illuminate Bosporus Bridge but also link the continents of Asia and Europe.

**LTW's LED Waterproof Connectors are utilized
by LED lighting system on Bosporus Bridge**
